

Brief

Lively veterinarian have had issues with their tells prescribing the wrong prescriptions to pet owners, causing pets to no longer be so lively.

When a prescription of specific, potentially deadly, medication is prescribed display a message to confirm dosage and complete the relevant dosage confirmation form.

The message should be like bellow.

****Dosage alert****

{

Prescribed medication, FleaAway, can be potentially to be deadly.

Dosage:

100ml

Instructions:

Use as hair/body wash, once per day for six days.

Misuse guide:

If treatment comes into contact with eyes or is ingested please see your closest coroner.

}

As this applies to multiple treatments, ensure that the following parts can be modified separately from the message and format:

Medication

Dosage value

Instruction of use
