

Brief

Guitarkulele are a guitar and ukulele manufacturer and want to show a guitar chord in their terminal ordering system

Display a console message to show the tablature for their brand theme.

Use the message format bellow:

```
e | --0-----0--0-----0
B | --1-/-3--3-----3-----3
G | --0-----0-----0-----0
D | --2-/-4-4-----4-----
A | --3-/-5-5-----5--
E | --0-----0-----0----
```

They may want to change the theme melody in the future to parameterise each line and display sequentially.

Note, instead of re-typing the above, and run the risk of incurring a typing error, it may be better to simply copy the text into your clip board and paste into your code file.
